ZoneOS

HUD, UI and PDA overhaul · 0.5.0-alpha · 2026-11-07

Your PDA sets the tier. Find a better one and the whole interface steps up with it: the PDA screen, the map, the inventory, trading and crafting, and the HUD if you want it to.

The manual, written by Claude.

Four tiers

The screen, map and menus follow the PDA you carry. The HUD starts on Gen 3; set HUD style to Follow PDA and it steps up too. Prefer one look? Pick it in Settings and keep it.
